

OXY CORPORATE FAST FACTS

GLOBAL COMPANY

Oxy is an international energy company that produces, markets and transports oil and natural gas to maximize value and provide resources fundamental to life. The company leverages its global leadership in carbon management to advance lower-carbon technologies and products. Headquartered in Houston, Oxy primarily operates in the United States, the Middle East and North Africa.

10-YEAR TRANSFORMATION

Over the past decade, Oxy has doubled production to 1.4 million barrels of oil equivalent per day, expanded its resource base to ~16.5 billion barrels of oil equivalent supporting more than 30 years of production, and grown reserves to 4.6 billion barrels of oil equivalent. Over the same period, the company has shifted its portfolio toward the United States, which now accounts for 83% of total production.

LOW-CARBON LEADERSHIP

With decades of experience in large-scale CO₂ transportation, use and storage for enhanced oil recovery, we are leveraging our carbon management expertise to advance low-carbon initiatives, such as carbon capture, utilization and storage, Direct Air Capture and sequestration hubs, to help our company and other industries achieve their net-zero goals.

Among the Largest U.S. Producers

Oxy is one of the largest oil and gas producers in the United States, including a leading producer in the Permian and DJ basins, and offshore Gulf of America, with approximately 1.2 million barrels of oil equivalent per day of domestic production.

CO₂ EOR Leader

With 50-plus years of experience, Oxy is the industry leader in applying carbon dioxide for enhanced oil recovery (CO₂ EOR) in the Permian Basin and among the largest CO₂ operators globally. CO₂ EOR is a core part of Oxy's long-term development strategy, enabling increased recovery from existing reservoirs while supporting integrated carbon management. CO₂ EOR can increase ultimate oil recovery by 10%-25%.

Low Carbon Ventures

Our Low Carbon Ventures (LCV) is developing one of the largest CO₂ sequestration platforms in the United States, with five hubs under development across Texas and Louisiana. LCV also fosters emerging technologies with the potential to position Oxy as a leader in the production of low-carbon energy and products, including NET Power and our wholly owned subsidiary TerraLithium.

STRATOS Commissioning Underway

Oxy subsidiary 1PointFive is developing the largest Direct Air Capture (DAC) facility in the world, called STRATOS, which is being commissioned in Texas. STRATOS is designed to remove up to 500,000 metric tons of atmospheric CO₂ annually once fully operational.

A Leading Gulf of America Operator

Oxy is the fourth-largest producer in the deepwater Gulf of America and among the largest independent leaseholders, with eight operated deepwater facilities.

Permian Basin Leadership

Oxy is a leading producer and the largest acreage holder in the Permian Basin, with assets concentrated in West Texas and Southeast New Mexico.

A Leading Producer in The Rockies

Oxy's oil and gas assets in the Rockies region of the U.S. are in Colorado and Wyoming. We are a leading producer in Colorado's DJ Basin. In Wyoming, we are a key operator in the Powder River Basin.

Top Independent Oil Producer in Oman

Oxy has been operating in Oman for 40 years and today we are the largest independent oil producer in the country. Since we began operations, we have produced more than 1.4 billion gross barrels of oil equivalent, including condensate. In 2025, Oxy secured a 15-year extension of its flagship Mukhaizna steamflood project, reinforcing its long-term presence in the country. Oxy is also a leading employer of nationals in Oman and is committed to developing and advancing Omani citizens in positions from entry-level to executive management.

Long-Term Partnerships in the UAE

Oxy is a partner with ADNOC in a 30-year joint venture in Al Hosn Gas, a world-class mega-facility in the United Arab Emirates (UAE) and one of the largest natural gas developments in the Middle East. We were awarded separate 35-year concessions to explore and develop onshore Blocks 3 and 5.

Strong Safety Performance

Safety is an integral part of Oxy's company culture, and we take pride in our track record. In 2025, Oxy achieved its best employee safety performance ever for its total recordable injury rate.

Partner of Choice®

We value our reputation as a Partner of Choice® and work hard to conduct business in a manner that safeguards our employees and contractors, benefits neighboring communities, strengthens regional economies and provides energy essential to society, while working to minimize our environmental footprint.

Artificial Intelligence

Artificial Intelligence (AI) is embedded across Oxy, enhancing and supporting drilling, production, subsurface evaluation and key corporate functions. By applying AI to both near-term operational optimization and longer-term technical challenges, we're improving safety, efficiency and performance while advancing how resources are developed over time.
