

UNITED ARAB EMIRATES FAST FACTS

SUCCESSFUL PARTNERSHIPS

Oxy has a legacy of successful partnerships with ADNOC, including our 30-year joint venture in Al Hosn Gas, one of the largest Middle Eastern natural gas developments. In 2019 and 2020, Oxy acquired 9-year exploration concessions and, subject to a declaration of commerciality, 35-year production concessions for Onshore Block 3 and Block 5, which cover a combined area of approximately 2.5 million acres, and are adjacent to Al Hosn Gas. In 2023, Oxy commenced first oil production in Onshore Block 3.

REGIONAL SUPPORT

Oxy has had a presence in the UAE for over 20 years. Our Abu Dhabi office provides support for Oxy's Middle East oil and gas operations.

OPERATIONAL EXCELLENCE

Al Hosn Gas production has exceeded expectations due to optimization efforts that have required minimal capital. Following an expansion project in 2023, production capacity of the processing facilities increased from 1.28 Bcf/d to 1.45 Bcf/d. Oxy's 40% participating interest in Al Hosn Gas includes the Shah Gas Field and sour gas processing facilities that process natural gas and separate it into salable gas, condensate, NGL and sulfur.

EMISSIONS-FREE POWER

Oxy's Al Hosn Gas joint venture switched from gas-powered to nuclear energy in 2022, with more than 400,000 metric tons of CO₂e eliminated with emissions-free power.

MEETING ENERGY NEEDS

Oxy is a partner with UAE-based Mubadala and TotalEnergies on Dolphin Energy Limited, which supplies natural gas produced in Qatar to markets in the UAE and Oman. Dolphin Energy Limited is the premier trans-border natural gas project in the Middle East and one of the region's largest energy initiatives.

Strong Safety Performance

Oxy conducts business in a manner that protects the health and safety of people and the environment at our facilities. Our consistently strong safety performance reflects our employees' dedication to creating and maintaining safe work environments. In our Onshore Block 3 and Block 5 activities, we proudly marked six consecutive years without a recordable injury, achieving a major Health, Safety, and Environment (HSE) milestone that also includes over 4 million work-hours. This accomplishment is a testament to the unwavering commitment to our HSE culture and our dedication to safe operations.

Low-Carbon Leadership

With decades of experience in large-scale CO₂ transportation, use and storage for enhanced oil recovery (EOR), we are leveraging our carbon management expertise to advance low-carbon initiatives such as carbon capture, utilization and storage (CCUS), Direct Air Capture (DAC) and sequestration hubs, to help Oxy and other industries achieve their net-zero goals.

Reducing GHG Emissions

Efficient capture and use of natural gas are key elements of Oxy's Net-Zero strategy. Oxy was the first U.S. oil and gas company to endorse the World Bank's "Zero Routine Flaring by 2030" initiative. We were also the first major U.S. producer in the Permian Basin to join the Oil and Gas Methane Partnership 2.0, a Climate and Clean Air Coalition initiative led by the United Nations Environment Programme, as well as the Methane Guiding Principles. At COP28 in Dubai, Oxy was an original signatory to the Oil and Gas Decarbonization Charter and committed funding to the World Bank's Global Flaring and Methane Reduction Partnership.

Partner of Choice®

We value our reputation as a Partner of Choice® and work hard to conduct business in a manner that safeguards our employees and contractors, benefits neighboring communities, strengthens regional economies and provides energy that is essential to society, while working to minimize our environmental footprint.

Emirates Foundation

Oxy is committed to enhancing quality of life in the communities where we operate. Oxy was one of the first supporters of the Emirates Foundation when it was established in 2005, and we have partnered with the Foundation in multiple social responsibility programs. Our support has primarily focused on youth empowerment through volunteer initiatives, with a particular emphasis on Ne'ma—the National Food Loss and Waste initiative—since 2022.

Volunteering in the Community

Oxy's UAE team partnered with the Emirates Foundation in Al Qana to prepare Iftar meal boxes for families in need, supporting the Foundation's Takatof program and Ne'ma, which helps reduce food loss and waste while supporting nearly 5,000 families across the UAE. The team also held a Ghaf tree-planting event with Companies for Good and joined a mangrove planting event at Jubail Mangrove Park with Al Hosn Gas, planting 20 saplings as part of Oxy Abu Dhabi's emissions-reduction efforts.
