

OMAN FAST FACTS

A 40-YEAR LEGACY

Oxy has been operating in Oman for over 40 years, where we have steadily increased production and reserves. Today, we are the largest independent oil producer in the country, with a portfolio spanning over 6 million gross acres (more than 24,000 gross square kilometers).

Oxy's key operations are located in northern Oman, including light oil production in the Safah and Wadi Latham fields in Block 9, as well as Khamilah field in Block 27. We also operate the Muradi Huraymah plant in Block 62, and lead the development of heavy oil at the world-class Mukhaizna field in Block 53 in south-central Oman.

DIVERSE PORTFOLIO

Oxy Oman has built a diversified production portfolio of light oil, gas, and heavy oil assets. In northern Oman, Oxy's capability to efficiently develop geographically diverse light oil accumulations has supported sustained production growth, while gas operations in Block 62 have contributed to Oman's domestic energy supply through reliable production. In south-central Oman, Oxy has established the Mukhaizna field as one of the world's leading heavy oil developments. Oxy Oman's operations have resulted in a cumulative production of more than 1.7 billion gross barrels of oil, including condensate.

EXPLORATION OPPORTUNITIES

We continue to deliver exploration success across our operating blocks by leveraging advanced seismic imaging, subsurface modeling, and deep geological expertise. Ongoing exploration activity in our mature Blocks continues to generate new opportunities, while Blocks 30, 51, and 72, located adjacent to our existing operations, enable efficient development by utilizing existing infrastructure. In south-central Oman, exploration of deeper horizons beneath the Mukhaizna thermal project in Block 53 has opened new plays that are under development.

PATHWAY TO NET ZERO

We are advancing a clear emissions-reduction roadmap in our Oman operations that includes methane management, flare recovery projects and electrification initiatives. Oxy Oman is committed to eliminating routine flaring before 2030 and has already achieved an 80% reduction from baseline levels, reaching zero routine flaring in Blocks 9, 27, and 65. We are also exploring technologies to decarbonize heavy oil development, including CO₂ point source capture and renewable energy solutions.

Low-Carbon Leadership

We are leveraging our carbon management expertise to advance low-carbon solutions that support Oman's net zero goals. In 2023, Oxy signed a Memorandum of Understanding with OQ Gas Networks SAOC to evaluate potential CCUS projects in Oman, and the CCUS and Blue Hydrogen Policy & Regulatory Framework Terms of Reference with the Ministry of Energy and Minerals. Oxy Oman aims to facilitate collaboration among key stakeholders to advance effective implementation of CCUS in the Sultanate.

Omanization and Empowerment

One of the largest private employers in the country, Oxy is committed to developing Omani talent across all levels of the organization. More than 96% of our employees, including 95% of leadership roles, are Omani nationals. We are committed to the hiring and training of individuals from local communities located in our concession areas, and our comprehensive Fresh Graduates Development Program offers rotational assignments, mentorship, blended learning, and field exposure to equip early-career professionals in their journey to success.

September 2026

Safety Excellence

Oxy Oman is committed to fostering a Zero Harm culture that prioritizes the safety and well-being of all our employees and service providers, encouraging everyone to embody this value in every aspect of their work. Programs like *Boots on the Ground* and *Life Saving Rules* empower employees to identify potential risks, speak up and stop work if necessary and reinforce a proactive, values-driven safety culture.

EOR Leader

Since assuming operations at the Mukhaizna field in 2005, we have developed one of the world's largest mechanical vapor compression facilities to support steamflood enhanced oil recovery (EOR) operations and increased production. In 2025, Oxy signed a 15-year extension to the Exploration & Production Sharing Agreement for Block 53, reinforcing our long-term commitment to Mukhaizna and creating the opportunities to further grow resources through advanced EOR, strategic drilling, and technology-driven optimization.

In-Country Value and Economic Development

Oxy Oman plays a leading role in advancing In Country Value (ICV) by strengthening local supply chains, supporting Omani businesses and creating sustainable economic opportunities. Our *Tasharuk* program focuses on building the capability of Omani contractors and small and medium enterprises, while the *Is'haam Program* supports workforce development by creating structured training pathways and job opportunities aligned with industry needs.

Advanced Technologies and AI

Oxy Oman advances operational excellence by deploying advanced technologies and Artificial Intelligence (AI) to enhance efficiency, performance and sustainability. Key innovations include *OxyJetting* stimulation to improve well productivity, *OCarb* reservoir conformance technology to address water flood performance challenges, and the *Oxy Field Optimizer* (OFO) AI advisory system that supports optimized steam management. Our in-house AI-driven optimization and predictive analytics systems enable smarter decision-making and unlock incremental value across Oxy Oman's asset portfolio.

Partner of Choice®

We value our reputation as a Partner of Choice® and work hard to conduct our business in a manner that safeguards our employees and contractors, benefits neighboring communities, strengthens regional economies, and provides energy that is essential to society, while working to minimize our environmental footprint. Oxy Oman works in close alignment with key stakeholders including local communities, the Ministry of Energy and Minerals, and the Government of Oman to deliver long-term value in support of Oman Vision 2040. Through its Corporate Social Responsibility program, Oxy impacts thousands of people through targeted initiatives in education, welfare, HSE, culture and sports, employee volunteerism and charitable contributions.
